Challenges Preventing Working From Home Smoothly and Securely

Remote Access

- Employees don't have the adequate equipment
- Business applications not available remotely
- You can't setup & manage devices remotely

Collaboration

- No tool for video calling/meetings
- No file sharing possible
- Current setup doesn't support fast-changing needs

Network

- Home Wi-Fi setups not adequate
- No VPN connection
- Network architecture not robust enough to support surge in video calling

Communication & Change Management

- Users are not trained/informed to work remotely
- No remote work policy
- No governance in place

Security

- Employees aren't trained regarding phishing scams/malware
- Inadequate backup and data recovery
- No protective protocol
- Navigating Data/Privacy regulations

- SharePoint Online

Windows Virtual Desktop

- Build your WVD in Azure - Funding available for qualified customers

Modern Management

- Identity
- Devices
- Apps & Data

Security

- Secure connectivity
- SSO & multi-factor authentication

Windows Virtual Desktops in Azure

WVD is a comprehensive desktop and app virtualization service that runs on Microsoft Azure. Users love the native Windows 10 experience and the ability to access their desktops anywhere, on any device. Deployment takes minutes and security and compliance are built in.

Softlanding has 3 approaches to get you started with your Windows Virtual Desktop journey:

Fast Start

- A \$7,500 fixed-price engagement to establish an initial WVD footprint to tackle the needs of the moment .

Production Deployment

- A Microsoft-funded deployment to establish customized images, harden security, and more.
- Microsoft funding is contingent on a commitment to deploy at least 25 monthly active users by end of June.
- Deployment can be WVD Native, Citrix Cloud + WVD, or VMware Horizon Cloud on Azure + WVD

Full Support

- In addition to the production deployment, Softlanding can provide training and post-implementation support through our service desk to lighten the load on your IT team.

Microsoft offers up to \$50K funding to build your WVD environment

Teams Rapid Deployment & Teamwork Assessment

In response to the COVID-19 crisis, Softlanding has created a Teams Rapid Deployment package to get you up and running quickly on Microsoft Teams. If you already have Teams, you can take advantage of the Teamwork assessment to harness all the benefits Teams has to offer.

Teams Rapid Deployment*

Funding available

1-2 weeks

Get up and running with your own Microsoft Teams environment in less than two weeks

- Develop custom environment
- Connect your apps
- Create automated workflows
- Show you the ins and outs of Microsoft Teams

Add managed services for Microsoft Teams to give your users the support they need as they adjust to working remotely

Teamwork Assessment

Funding available

3-day workshop

Harness the power of Teams

- Discover the business value Teams has to offer
- Identify cultural and technical best practices to ensure adoption
- Engage in an 'Art of The Possible' demo that shows teamwork business use cases and scenarios and what's achievable with Microsoft 365.
- Receive a customized roadmap for teamwork with actionable recommendations.

* You must have an existing Office 365 tenancy to qualify for the Rapid Deployment

Modern Management: Managing and Protecting Devices, Identities, Data and Applications

Through the course of the engagement, Softlanding consultants will help your organization establish a plan to enhance your management of identity, device, and app/data for the work-from-home population.

This engagement can be completed in less than a week, to help keep your business secure across all devices.

Engagement Overview:

- Review current state and risk
- Planning workshop
- Remediation and Implementation Roadmap
- Implementation Assistance
- Service Desk Orientation
- Post Deployment Support

Modern Management Engagement: \$7,500
